VEGETABLE SEEDS

We continue our long established policy of offering only the highest grade seeds because we are sure it pays our customers as well as ourselves, to plant the best seed obtainable. However, in accordance with the universal custom of the seed trade, we give no warranty, express or implied, as to description, quality, productiveness or any other matter of any seeds we send out, nor will we be in any way responsible for the crop.

Orders of \$2.00 or over are subject to a discount of 5% for cash with order.

Novelties in Vegetables for 1931

BEANS—Dreer's Wonder Bush Lima

Very desirable because of its earliness, productiveness and its fixed habit of growth in the dwarf or bush form. The strong, upright plants are completely covered with large pods containing four beans fully as large as those of the pole limas. The beans are flat and broad and of superior flavor. On account of its unusual earliness it can be planted well on in the season without much risk of failure. 2 lbs. 85c, lb. 45c.

BEANS—Wonder of France

Imported. A valuable variety with long, tender pods of bright green color. Early and prolific. 2 lbs. \$1.25, lb. 65c.

BEETS—Leonard's Egyptian

Dark red, free from light zones, early and an excellent beet in every way. $\frac{3}{4}$ lb. 75c, oz. 25c, pkt. 10c.

BROCCOLI—Italian Green Sprouting

This vegetable resembles the cauliflower. The plant forms a large, solid head which remains green. After the head is cut out, sprouts develop from the leaf-axils, each sprout terminating in a small edible head. For July and August crop sow the seed in a hotbed in March or April, and for fall crop in the open ground in May. $\frac{1}{4}$ oz. \$1.25, pkt. 25c.

CARROTS—Hutchinson

This variety is of the Danver's type, but the roots are not so broad at the shoulder and are also considerably longer and more cylindrical. A heavy cropper, extensively grown by the market gardeners. $\frac{1}{4}$ lb. \$1.50, oz. 50c, pkt. 10c.

CAULIFLOWER

Dreer's Earliest Snow Storm. A dwarf variety which makes a fine large and extremely beautiful snowy white head. Much earlier than any other variety. $\frac{1}{4}$ oz. \$1.75, pkt. 25c.

ONION, SWEET SPANISH

CUCUMBER

Early Fortune. Of rich dark green color, the fruit measures 9 inches long, flesh white, firm and unusually crisp; few seeds. Superior to all other green sorts. $\frac{1}{4}$ lb. \$1.00, oz. 35c, pkt. 10c.

CUCUMBER—Longcu

A fancy cucumber of surprising earliness growing 12 or 13 inches long, with dark green skin and few spines. Suited equally well to outdoor and under glass production. Oz. 60c, pkt. 15c.

CORN—Golden Sunshine

Of rich golden color, the ears are about an inch longer than Golden Bantam, have 12 rows instead of 8, while quality is equal to the latter sort. Most important, however, is its exceptional earliness, being from 7 to 10 days earlier than Bantam. 5 lbs. \$2.25, 2 lbs. \$1.00, 1 lb. 55c.

ONION—Sweet Spanish

Of the Prizetaker type, but earlier, milder, larger and a better shipper. In every way a most desirable onion. $\frac{1}{4}$ lb. \$1.50, oz. 40c, pkt. 15c.

ONION SETS—Australian Brown

Quite similar to Yellow Danvers, but darker in color and a somewhat better keeper. 8 lbs. \$2.25, 1 lb. 35c.

PEPPER—California Wonder

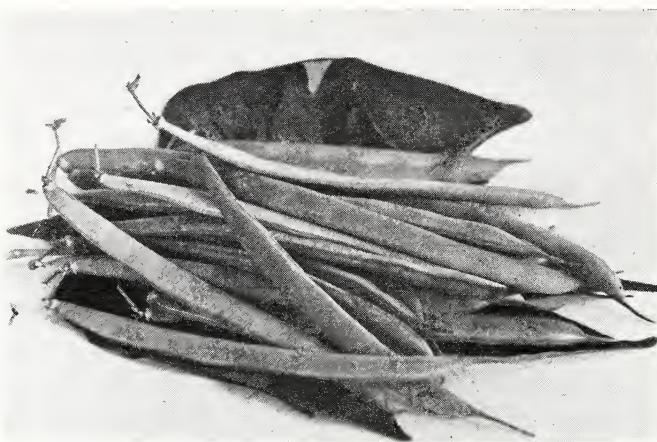

Sturdy, upright plants, bearing six or seven smooth fruit of immense size. The outstanding feature of the fruit is the remarkable thickness of the sweet, crisp, flesh making them unequalled for stuffing, salads, etc. $\frac{1}{2}$ oz. 65c, pkt. 25c.

TOMATO—Winsall

The outstanding characteristics of this tomato are its remarkably vigorous and disease-resisting growth, its uniformly round form, its large size and delicious flavor. It is undoubtedly the most meaty tomato ever produced, often weighing three pounds or over, and is almost entirely seedless. To get the best results it should be grown on stakes or trellises. Pkt. 25c.

TURNIP—Ruta Baga, Macomber

Considered one of the best strains of white winter turnip. $\frac{1}{4}$ lb. 75c, oz. 25c.

BEANS, BOUNTIFUL

Standard Varieties of VEGETABLE SEEDS

ASPARAGUS ROOTS

Martha Washington. One of the best of the Washington type. Disease resisting, stalks large and of uniform size. 2 yr. roots per hund. \$2.50, per thousand, \$20.00.

ONION (Yellow Globe Danvers)

Why Not Grow Melons?

Trial plots of the department of vegetable gardening at M.A.C. during the past four years have shown quite conclusively that muskmelons can be well grown in this section of the state.

Various cultural methods have been followed in the tests and approximately 70 varieties and strains comparatively studied.

The two varieties which are the most outstanding sorts and are the ones recommended to be grown are: Golden Champlain and Bender's Surprise.

In culture the most outstanding factors recommended are the use of liberal quantities of manure and commercial fertilizer, the use of plant protectors in the spring, the use of a good grade mulch paper, and the consistent and thorough practice of spraying with Bordeaux mixture.

IPOMOEA—Baby Blue

A beautiful climber, blooming from July until frost, covered with flowers about 2½ inches across and of such substance that they often remain open all day. The color is of the most lovely light blue that we have ever seen. Pkt. 25c.

LARKSPUR—Lilac Spire

A pleasing shade of soft lilac. Combines well with other more well-known shades. Pkt. 25c.

LARKSPUR—Miss California

A greatly improved strain both in the habit of growth and in the charming pink color, which comes practically 100% true. Pkt. 25c.

LINARIA MAROCCANA—Excelsior

Mixed

Small, dainty flowers resembling miniature Snapdragon, each with Columbine-like spurs. Colors range through crimson, gold, pink, mauve, blue, chamois and rose. Blooms in eight weeks from seed, which may be sown outdoors in May. Pkt. 15c.

SCABIOSA—Loveliness

A glorious new color in giant flowering annual scabiosa; varying tones of soft delicate salmon rose with long stiff stems, and a delightful fragrance. Pkt. 25c.

VERBENA—Luminosa

The trusses are of the largest size, luminous or coral pink. Free blooming and of vigorous habit. Pkt. 15c.

ZINNIA—Picotee Salmon Beauty

A beautiful color; the diversified shapes and markings of the petals, all carrying the salmon blend, make it an excellent flower for cutting or for bedding. Pkt. 25c.

ZINNIA—Mexicana Perfection

A very dwarf variety, bearing small double flowers of unusual colorings; makes a beautiful border. ¼ oz. 50c, pkt. 15c.

ANNUAL FLOWER SEEDS (STANDARD VARIETIES)

Annuals are those which go through all stages of their growth in the open ground, from germination to the final seed ripening. They form a very useful class, and are valuable for garden decoration, filling gaps in the perennial border, and for cutting.

The greatest cause of failure in the growing of annuals is due to their not being sufficiently thinned. Dwarf sorts should be thinned to about 4 inches apart, intermediate sorts to about 6 inches, and taller varieties from 10 to 15 inches.

Half-hardy Annuals should be sown under glass in March and transplanted at an early stage to prevent their becoming "leggy", usually being hardened off before putting in the open ground.

AGERATUM—Floss Flower

One of the best bedding plants. Its pretty brush-like flowers are produced in clusters and it blooms constantly all through the summer.

Blue Ball. The compact plants grow 6 inches high, of unusual uniformity of growth, bearing over a long season large flossy flowers of deep ageratum blue. A wonderful edging plant. $\frac{1}{4}$ oz. 50c, pkt. 10c.

Blue Perfection. Color deep amethyst-blue, a compact flower. $\frac{1}{4}$ oz. 40c, pkt. 10c.

HIGH GRADE FERTILIZERS

We recommend the AA and Bowker brands of fertilizer because they have proved, by careful tests and experiments over a long period of years, their suitability to the soil conditions.

These fertilizers are especially compounded of materials capable of markedly increasing the yield and quality of the crops.

Don't buy fertilizer because it is cheap. Buy for the plant food value. The best is always cheapest in the end.

AA COMMERCIAL FERTILIZERS

Grass and Lawn Top Dressing, 6-6-4. In 100 lb. bags \$2.75, per ton \$44.50.
